The Solaria Universe Reading Order

Peckham & Valenti say there's no single right way to read Solaria; this is the spoiler-free, maximum-impact path the big reader guides share (Thatgirlreads' favourite, Read Romantasy's emotional-impact order). Three Zodiac Academy books teach the world, then all of Ruthless Boys (set five years earlier) BEFORE Shadow Princess, which spoils its ending. After ZA4 comes the painful-on-purpose trip back to the 0.5 and 1.5 prequels. Seth on the Moon and Night are read early as single chapters of Live and Let Lionel; the rest of that book waits until after 8.5. Darkmore (five years later) follows the finale, and Sins of the Zodiac comes last.
