

The Solaria Universe Reading Order

Peckham & Valenti say there's no single right way to read Solaria, so this is the path the bonus-aware guides converge on: three Zodiac Academy books to learn the world, all of Ruthless Boys (set five years earlier), then the rest of ZA with every companion story slotted where it lands safely. Darkmore (five years later) waits until after the finale, and Sins of the Zodiac comes last. Several bonus stories were later collected in Live and Let Lionel — the notes say which, so you can skip repeats.
